  Completed an internship in Full Stack Development, where I gained hands-on experience in building and managing web applications, working on both front-end and back-end technologies.

Projects

- Title: Google Keep Notes (Clone)
  Tools & Technologies: **PHP, Laravel, Angular JS , MVC Architecture, AJAX, MySQL for Database .**

  Description:
  A web-based note-taking app inspired by Google Keep, built with Laravel and AJAX for a responsive user experience. It allows users to create, manage, and organize notes with real-time updates and a clean interface.

  User Authentication :
  Secure login and registration.

  Notes Management:
  Create, update, delete, pin, and label notes.

  Search & Filter :
  Find notes by title, label, or content.

  AJAX Functionality:
  Real-time note actions without page reloads.

  Database Integration (MySQL):
  Store user and note data efficiently.

  Reminder Module:
  Schedule reminders using Laravel Jobs for background task handling.
- Title : Health plus pro.
  Tools & Technologies:
  Springboot, hibernate JPA, RESTful API, List API, Spring MVC, OOPS , MySQL for Database.

  Description :
  This project comes under Health care domain.

  Modules :

  Doctor Module :
  Save the records of the doctor.

  Patient Module :
  Save the details and records of the patients.

  List API Module :
  List the records of doctor and patients.

Soft Skills

- Team Player : Collaborated effectively with team members .
- Adaptability : Adapted quickly to changing requirements and new technologies to meet project goals efficiently.
- Quick Learner : Quickly learned and applied new skills to enhance the project's development and performance.

Declaration

- I hereby declare that all the information provided in this resume is true and accurate to the best of my knowledge.

Yours sincerely
(Shyam David)
